Pangasinan, Philippines

PROFILE

Computer Science student at the University of Pangasinan – PHINMA, graduating in 2027 and looking for an internship in software development. I build full-stack web and Android software. My thesis, Cable Manager, is billing and subscriber management for a local cable and internet provider: an office system, a subscriber portal and an Android app on one database.

EDUCATION

BS Computer Science · University of Pangasinan – PHINMA

Expected 2027

Thesis: Cable Manager, as full-stack developer

THESIS

Cable Manager · Full-stack developer

2026

PHP 8 · MariaDB · Apache · JavaScript · Kotlin · Jetpack Compose · PowerShell · Inno Setup · Tailscale

- Built billing and subscriber management for a local cable and internet provider, delivered three ways on one database: an office system, a subscriber portal that installs on a phone, and a native Android app.
- Packaged the office system as a single Windows installer that bundles its own Apache, MariaDB and PHP, so it runs on one computer with no internet connection and nothing else installed.
- Made backup restores atomic: a safety copy first, then tables refilled inside one transaction, refusing wrong, truncated or newer backup files before touching anything.
- Secured it with bcrypt, prepared statements, CSRF tokens, server-side access control for four roles, and sign-in throttling on all three entry points with an audit trail.
- Wrote 11 automated test files that run with one command and rebuild a throwaway database on every run.

PROJECTS

Arts & Design Showcase

2026

Solo · Full-stack · PHP, MySQL

A gallery of artworks and artist profiles with search, messaging and an admin area for managing artists and artworks.

St. Francis Court

2025

Solo · Full-stack · PHP, MySQL

Court booking where players book and edit slots, and the admin sees court usage, monthly bookings and revenue trends.

ITE 393 Campus App

2025

Team · Programmer · Kotlin, Firebase

An Android campus companion: sign-in, student profiles, a floor-by-floor building map, events, courses and modules.

Auction Market

2026

Solo · Full-stack · PHP, MySQL, JavaScript

Sellers list items and buyers bid, with the current bid updating without a page reload, plus admin analytics.

PUCU Event Calendar

2025

Team · Programmer · PHP, MySQL, JavaScript

A school event calendar with organisation dashboards, user management, and upcoming, pending and finished events.

UCWD Leave Monitoring

2025

Team · Programmer · Kotlin, Firebase

An Android app where employees file leave applications and the office tracks and summarises them, with a web version.

SKILLS

Web

PHP, MySQL / MariaDB, JavaScript, HTML & CSS, progressive web apps

Mobile

Kotlin, Jetpack Compose, Firebase (Firestore, Realtime Database)

Tools

Git, Apache, PowerShell, Inno Setup, Tailscale

Practices

Prepared statements, CSRF protection, bcrypt, role-based access control, automated testing

Other

Photo editing, Microsoft Office

LANGUAGES

English (professional working) · Tagalog (full professional)
