PORTFOLIO

nathzramirez0-sys.github.io/My-Portfolio

github.com/nathzramirez0-sys

github.com/Nathan-281000

TECHNICAL SKILLS

- Full-Stack Web Development
- Android App Development
- Database Design
- Automated Testing
- Deployment & Packaging
- Cybersecurity & Ethical Hacking

PROGRAMMING LANGUAGES, TOOLS & FRAMEWORKS

- Kotlin | Jetpack Compose
- PHP | JavaScript | TypeScript
- MySQL | MariaDB | Room
- Firebase | Cloud Functions
- Git | GitHub Actions
- PowerShell | Inno Setup
- Photo Editing | MS Office

CORE WORK SKILLS

- Problem Solving
- Time Management
- Attention to Detail
- Teamwork & Collaboration
- Working Independently
- Clear Documentation

PROFILE SUMMARY

A Computer Science student at the University of Pangasinan – PHINMA and a full-stack developer, graduating in 2027 and looking for an internship in software development. Experienced in building web and Android software that holds up in real use: an office billing system that runs without the internet, a subscriber portal, and native Android apps in Kotlin with Jetpack Compose. Skilled in PHP, MySQL, JavaScript, Kotlin and Firebase, with a habit of automated testing and secure design. Works well independently and as part of a team.

EDUCATION AND CERTIFICATIONS

BACHELOR OF SCIENCE IN COMPUTER SCIENCE
University of Pangasinan – PHINMA | Expected 2027

- Thesis: Cable Manager, as full-stack developer
- Certified Cybersecurity Professional (CCP) | Appkademiya, Oct 2026
- Ethical Hacker | Cisco Networking Academy, Feb 2026
- Introduction to Data Science | Cisco Networking Academy, Jan 2026
- Introduction to Cybersecurity | Cisco Networking Academy, Jan 2026

PROJECTS

CABLE MANAGER: CABLE & INTERNET BILLING SYSTEM
Thesis Project | Apr 2026 - Oct 2026

PHP | MariaDB | Apache | JavaScript | Kotlin | Jetpack Compose | Inno Setup

As full-stack developer, built billing for a local provider on one database: an office system, a subscriber portal and an Android app.

- Packaged the office system as one Windows installer that runs offline.
- Atomic backup restores; bcrypt, CSRF tokens, four roles and throttling.
- 602 automated tests in 10 files, run with one command on a test database.

FERGBENTABLES: SHOWROOM APP FOR ANDROID TABLETS
Capstone Project | Oct 2026

Android | Kotlin | Jetpack Compose | Room | WorkManager | Apache POI

Built on my own an offline tablet app a showroom uses for its buyers, orders and stock.

- Orders tracked to delivery, PDF receipts, and stock that moves with each order.
- Restock and low-stock reminders; Excel exports of orders and inventory.
- 104 unit tests, 118 on-device tests, and a signed, shrunk release build.

THESISFLOW: THESIS GROUP MANAGER FOR ANDROID
Personal Project | Sep 2026 - Oct 2026

Android | Kotlin | Jetpack Compose | Hilt | Room | Firebase | Cloud Functions

Thesis groups track chapters, tasks and their adviser's feedback, even offline.

- Versioned drafts, a kanban board, push reminders and a defense countdown.
- Firebase back end with Cloud Functions and per-role security rules.
- 138 unit tests, 59 security-rule tests, and CI on every push.

OTHER PROJECTS

ARTS & DESIGN SHOWCASE
Client Project | 2026

A gallery of artworks and artist profiles with search, messaging and an admin area. PHP, MySQL.

ST. FRANCIS COURT
Solo Project | 2025

Court booking, with admin views of usage, monthly bookings and revenue. PHP, MySQL.

ITE 393 CAMPUS APP
Team Project, Programmer | 2025

An Android campus companion with a floor-by-floor building map. Kotlin, Firebase.

AUCTION MARKET
Solo Project | 2026

Live bidding that updates without a page reload, plus admin analytics. PHP, MySQL, JavaScript.

PUCU EVENT CALENDAR
Team Project, Programmer | 2025

A school event calendar with organisation dashboards and user management. PHP, MySQL.

UCWD LEAVE MONITORING
Team Project, Programmer | 2025

Employees file leave from their phones; the office tracks it. Kotlin, Firebase.

JONATHAN C. RAMIREZ

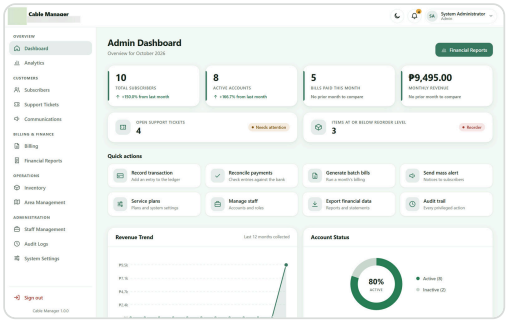

FULL-STACK DEVELOPER

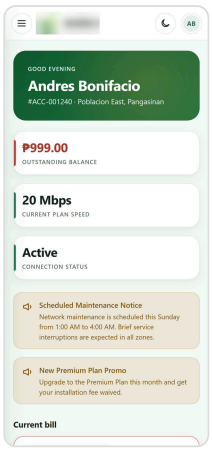

CABLE MANAGER: CABLE & INTERNET BILLING SYSTEM

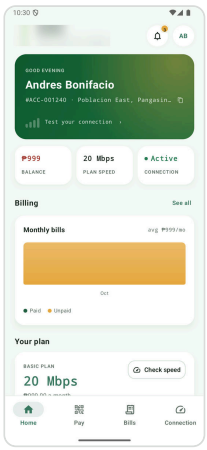

Thesis Project | Apr 2026 - Oct 2026

PHP | MariaDB | Apache | JavaScript | Kotlin | Jetpack Compose | Inno Setup | Tailscale

The office dashboard, the portal and the Android app, in one design since October. From test data; the client's name is blurred.

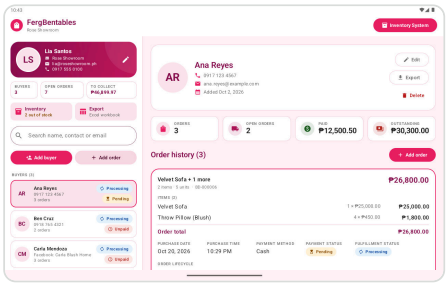

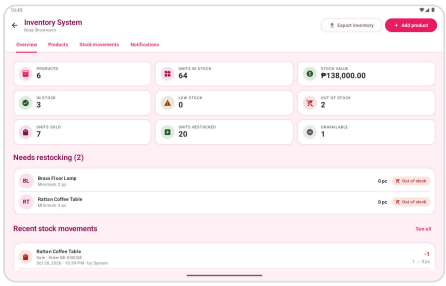

FERGBENTABLES: SHOWROOM APP FOR ANDROID TABLETS

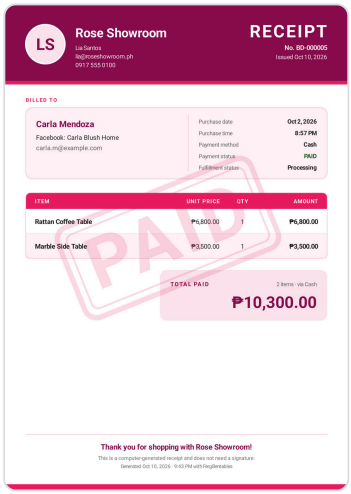

Capstone Project | Oct 2026

Android | Kotlin | Jetpack Compose | Room | WorkManager | Apache POI

Buyers and their orders, the Inventory System, and a PDF receipt for each paid order.

THESISFLOW: THESIS GROUP MANAGER FOR ANDROID

Personal Project | Sep 2026 - Oct 2026

Android | Kotlin | Jetpack Compose | Hilt | Room | Firebase | Cloud Functions

A group's overview with its defense countdown, the task board, and team stats.
